

Plywood Sheet Cut-Out (Nest)

The majority of the timber required for this Push Cart can be obtained from 1/2 a sheet of 12mm [1/2in] thick plywood. Most hardware stores will cut 1/2 a sheet of plywood for you. Plan correctly the placement of all the pieces before cutting. Draw out the pieces on the sheet of plywood before cutting with a panel saw (hand) or jigsaw (electric) or skill-saw (electric).
